

IBAK CLASSIC-LINE

TV Inspection Van

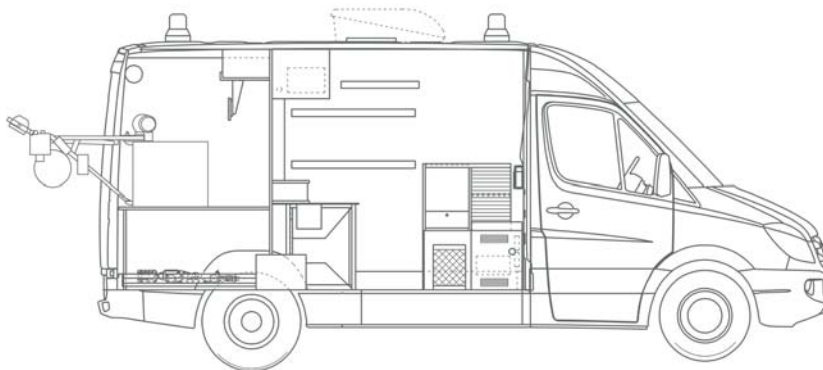

Serial outfitting for large capacity box-type vans

Practice-oriented scope of supply

For vehicles with short or long wheelbase

Total weight 3.5 or 5.0 t

IBAK CLASSIC-LINE

The **IBAK CLASSIC LINE** is a practice-oriented IBAK outfitting variant for the MB Sprinter model series.

Detail solutions with a high standard of workmanship form the basis for a long and economical service life. The body insulation ensures a balanced interior climate in the van. Light-weight, high-quality outfitting materials ensure sufficient space for the required inspection components.

The work areas in both the operator's and rear vehicle sections are of functional design in terms of ergonomics and ensure smooth working procedures and a high standard of operator comfort.

An extensive assortment of possible extras completes the range.
