

IBAK TOP-LINE

TV Inspection Van

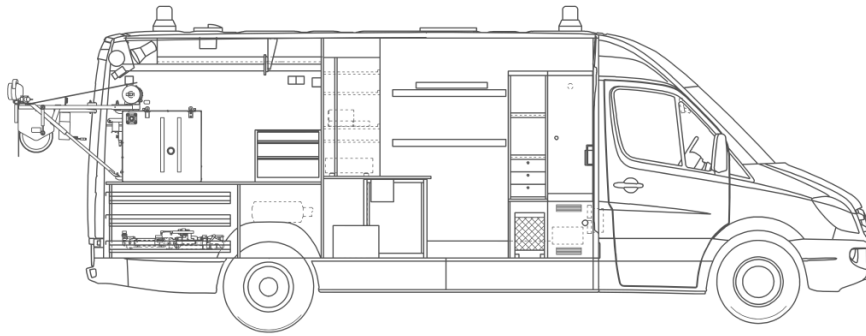

Serial outfitting for large capacity box-type vans

Extensive, complete scope of supply

For vehicles with long wheelbases

Total weight from 5.0 t upwards

IBAK TOP-LINE

The **IBAK TOP LINE** is the premium IBAK outfitting variant for the MB Sprinter model series. The well thought-out outfitting concept leaves nothing to be desired, as it already includes, over and above the basic outfitting, many useful extras such as extensive storage compartments, space-saving installation of the display monitors and air conditioning.

Detail solutions with a high standard of workmanship form the basis for a long and economical service life. The body insulation ensures a balanced interior climate in the van. Light-weight, high-quality outfitting materials ensure sufficient space for the required inspection components.

The work areas in both the operator's and rear vehicle sections are of functional design in terms of ergonomics and ensure smooth working procedures and a high standard of operator comfort.
