

Safety first!

1

1. KUV 3.1 with integrated protection grid and double pulley for LISY operation

2. KUV for KW305/310/505 to deflect the camera cable (winch boom – manhole)

3

3. KUV 3/KUV 3.1 to deflect the camera cable at the top of the manhole

2

4. KUV 1.2 to deflect the camera cable in the manhole (freely placeable)

4

5

5. KUV 3.1 with integrated protection

Cable deflection units for all applications

To ensure safe working during sewer inspection, suitable cable deflection units (KUVs) for all applications are available from IBAK. All IBAK KUVs are optimised for the stated cable bending radius.

What are cable deflection units for?

- They protect the camera cable from damage
- They ensure that the camera tractor and the winch operate synchronously
- They promote safety and help to prevent accidents

Which KUV for which application?

KUV (manhole – pipe)			Order No.
KUV 5.5	DN 100 upwards	Manhole Ø 300 mm	902313020
KUV 2.7	DN 150 upwards	Manhole Ø 600 mm	904350020
KUV 2.3	DN 150 upwards	Manhole Ø 600 mm/for LISY operation	409908320
KUV 1.2	To deflect the camera cable in the manhole		96000230

KUV deflection road – manhole/top edge of manhole			Order No.
KUV 3	To deflect the camera cable at top of manhole		900300130
KUV 3.1	To deflect the camera cable at top of manhole, with protection grid for standard manholes of 655 mm Ø		900300030
	Extension kit KUV 3.1 for LISY operation (double pulley)		900306091

KUV for winch boom – deflection to manhole		Order No.
KUV	For KW305/310/505	802617031

Customer Support /Sales

All KUVs are available from all IBAK partners and the IBAK branch offices:
