

## Product information 07/2011

### With retrofit kit: Rims for T66 useable on the KRA 65

Since the IBAK camera tractor KRA 65 was replaced by the T66, a number of changes have been made to the matching wheel sets. Whilst the KRA 65 used the conventional tyre wheel sets, granulated wheels and pneumatic tyres, the product portfolio has been expanded to include profile wheel sets in a range of sizes.

#### Modular wheel set system structure

The structure of the new wheel set generation in particular has changed decisively. In accordance with the IBAK principle of modularity, it is now also possible to replace the wearing parts (tyres) of granulated and profile wheels, without needing to buy a whole new wheel set including rims.

#### KRA65 owners benefit

In order that KRA65 owners are also able to use the new profile and granulated wheels, a retrofit kit is available, which facilitates fitting T66 wheels to a KRA65.

#### The retrofit kit:

##### Part number 902240091

It is possible to order the retrofit kit using the article number specified above. This kit includes four wheel adapters, 4 rims 52, 8 tyres, screws, mounting cone and tool. It is only necessary to have cleaning fluid, rim grease and thread locker "Loctite 243" available prior to fitting. The IBAK customer service team is naturally also happy to carry out the retrofit work if required.

#### Have the retrofit kit fitted

If you should decide to have the retrofit kit fitted, please get in touch with an IBAK branch or contact your local IBAK partner.

#### IBAK head office, Kiel

Tel. no. ++ 431 7270-314  
service@ibak.de

#### IBAK North West, Georgsmarienhütte

Tel. no. ++ 5401 896555-0

#### IBAK West, Krefeld

#### IBAK South, Illerrieden

Tel. no. ++ 7306 9270-0

Once you have **removed the size 52 rims from the KRA 65...**

... the wheel shaft is thoroughly cleaned. The shaft sealing ring must be replaced.

Afterwards, the wheel adapter is screwed on. It is possible to mount all T66 wheel sets onto this.

Retrofit kit

◀ Be they brown medium-hard, black soft profile tyres or granulated wheels: With the retrofit kit it is also possible to fit the wheels for a T66 (fig.) onto a KRA 65.

## First aid - the online support from IBAK

*Who hasn't been there: The inspection report is due in and something isn't working out quite as it should. In the heat of the moment one hasn't the heart to peruse the manual and locate the problem.*

With the UMTS option you will considerably alleviate the stress of such situations. This option enables the operator to conduct a "web conference" with an IBAK support team member. This means: The operator and the IBAK support personnel discuss the problem on the phone. At the same time, the support personnel is able to access the computer, with prior permission from the operator, and eliminate the problem right away. Furthermore, it is also possible to change the screen view so that the support personnel can show the operator, on his/her own screen, exactly what action or process to implement in order that everything functions correctly.

Very important to know: Prior to any access, a member of the support team will issue the operator with a conference number, which he/she must confirm. Access to the computer without prior permission, using the IBAK-UMTS option, is therefore impossible. Furthermore, the operator is able to terminate the conference at any time.

The UMTS option can be additionally booked when ordering an inspection vehicle, in order that the vehicle is equipped from the outset with the appropriate antenna. Likewise, it is possible to retrofit the majority of existing systems.

A virus scanner is naturally always included, as is the installation and instructions.

*Everyone has had a day on which nothing runs smoothly. Before valuable time is lost trouble-shooting, the IBAK support team provides assistance in the form of a web conference - following prior authorisation, the IBAK support personnel also receives access to the operator's computer and is therefore able to provide direct assistance in solving the problem. The connection is established using a LAN network or via WLAN with a UMTS stick. Photo: Wege-Zweckverband Segeberg*

## MiniLite with expanded equipment

*The new generation IBAK MiniLite has been updated and now comes with expanded equipment.*

The IBAK MiniLite is available right away with an extension system function. This means: When working with the operating system BS3.5, BS 5 or BS7, the operator automatically has an integrated extension option, which can connect the MiniLite directly with a large system by means of the camera cable. It is only necessary to purchase a headset in addition.

Furthermore, the MiniLite has a new stand, which guarantees greater stability.
